

9100

Machine Presentation

HIGHLIGHTS

- New 10" HD Touch screen
- Can be set to for 7oz, 9oz or 12oz drinks
- New and improved operating platform
- Easy to maintain thanks to colour coded internal parts
- LED illumination of the vend area
- Suitable for locations up to 200 drinks a day
- Available in ES, ES + FB Tea, SFB Tea or Instant versions
- Payment available on both machines
 - 9100 ES, Instant & SFB Tea is internal
 - 9100 ES + FB Tea is external

DESIGN AND USER INTERFACE

- New 10” HD Touch screen can play advertising or promotional videos and show still images
- Screen is fully customisable to suit the customers site, for example a change of background colour or unique drinks icons can be used
- Guided drink customization which allows the customer to tailor the drink to their own taste
- Nutritional information and allergens can be clearly and easily shared via the touch screen
- You have the ability to offer 2 different drink sizes, for example 9oz and 12oz

DESIGN AND USER INTERFACE

- There are multiple screens available (which you can scroll through) so a wide variety of drinks can be easily offered with no limitations – set your own drinks menu
- Messages can be shown across the top of the touch screen which are easily updated directly via the programming screens
- Possible to replace the instant coffee with milk to double the milk capacity of the machine
- 800cc boiler with new insulation to improve performance

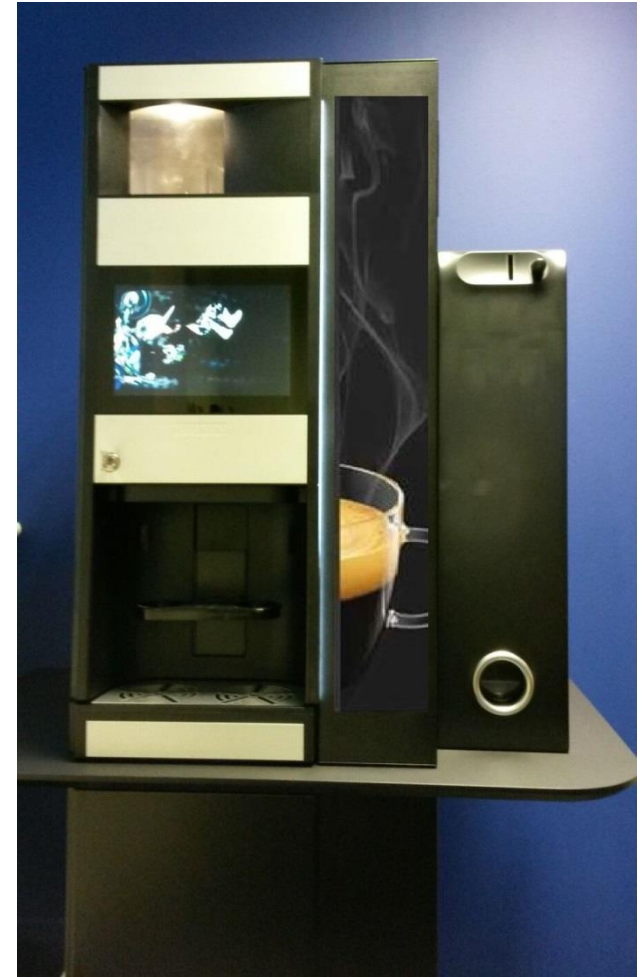

PAYMENT OPTIONS

- A payment system can be fitted directly to the 9100 ES without the need for an extra module (does require an additional payment preparation kit)
- The 9100 ES + FB Tea uses an external payment module which is fitted to the right hand side of the machine (see image to the right)
- If fitting more than one payment system a side payment module must be fitted.
- Payment module dimensions H 650mm

W 170mm

D 390mm

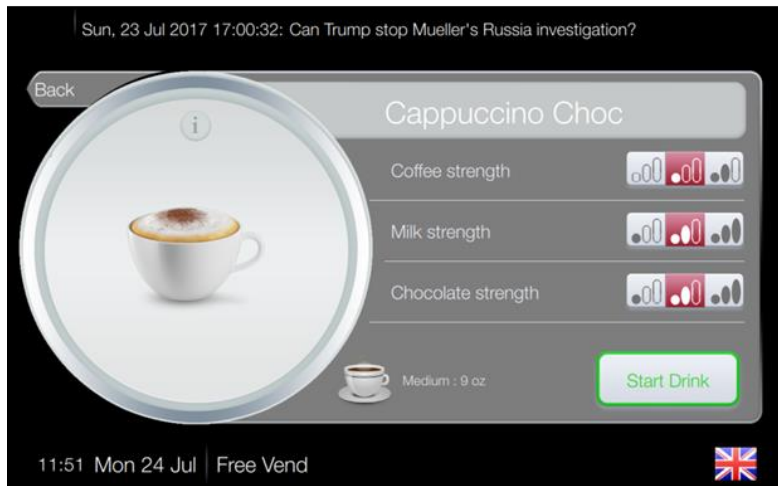

SCREEN FUNCTIONALITY

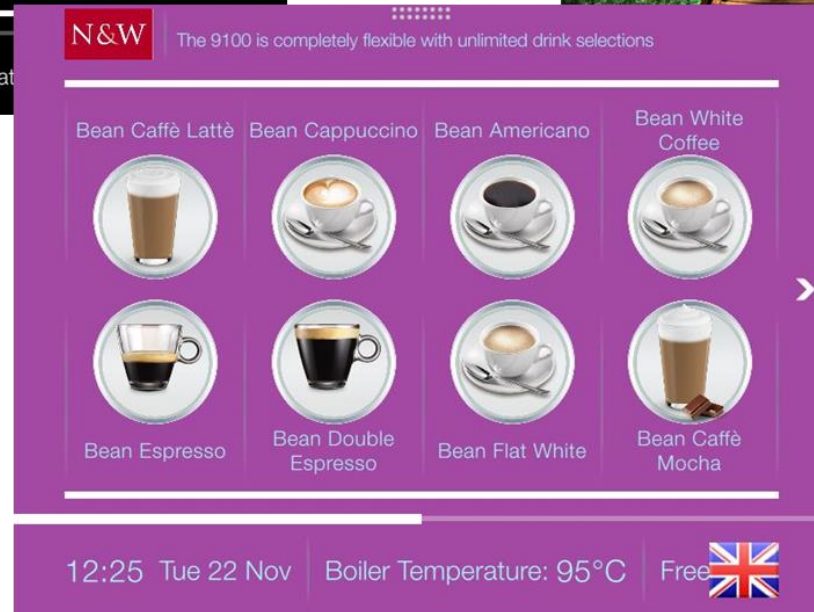

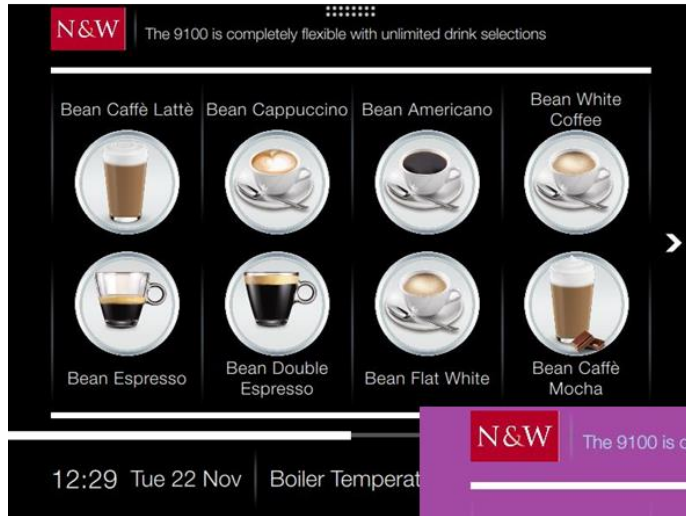

- Plays standby video – Single videos or you can create a playlist with multiple videos
- Plays individual drink selection video – Single videos or you can create a playlist with multiple videos
- Shows nutritional and allergen information
- Internet connection via LAN or Wi-Fi to manage RSS news feeds and e-mail alerts
- Wi-Fi to LAN convertor allows you to connect the machine to an already established Wi-Fi connection
- Screen managed by USB only (Giga Touch software is not required)

****NB Support maybe required from customers IT department to gain access to the network****

SCREEN DRINK PROCESS

SCREEN EXAMPLES

E-MAIL ALERT SYSTEM

- The internet connectivity on the 9100 allows the use of the e-mail alert feature, which can send information on the following:
 - Events, which include when the machine has been opened or cleaned
 - Failures, which could include issues with the coin mech, water or machine control board
 - EVA-DTS status report
- If this feature is turned on e-mails will be sent to a designated set of addresses whenever a predefined event or failure occurs.
- The EVA-DTS report will be sent as a pre-set timed event

****You will need to connect the 9100 to the internet via an Ethernet cable or by using a WiFi Kit****

E-MAIL ALERT SYSTEM

The image displays three overlapping screenshots of a mobile application interface, each with a red circle highlighting a specific menu item:

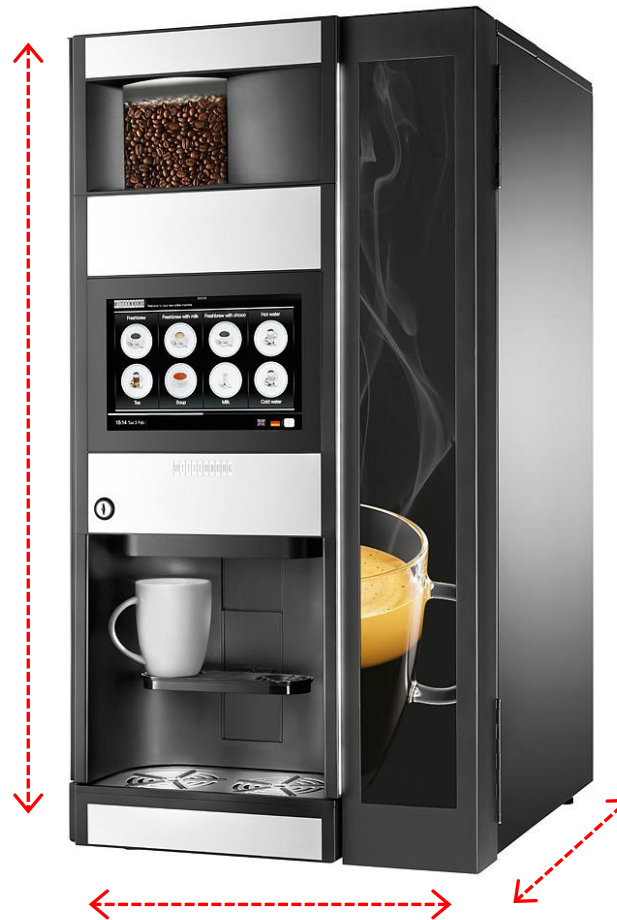

- Top Left Screenshot:** The 'Event alerts' menu item is circled. Below it, a list of settings is visible, including 'Event alerts', 'Failure alerts', and 'EVADTS status emails'.
- Top Right Screenshot:** The 'EVADTS status emails' menu item is circled. Below it, configuration options for 'Working Days' (set to 17) and 'Monday' (set to 8) are shown.
- Bottom Screenshot:** The 'Failure alerts' menu item is circled. Below it, a list of failure types is visible, including 'No water', 'Drip Tray full', 'Drip Tray not present', 'Volumetric counter', and 'Machine control board'.
